signoff-

DEMO data. Retained fixture lifecycle; not a production target assessment.

1 Executive summary

The retained report contains 9 process records across 2 families. 9 are accepted or completed records and 0 record gaps remain. Overall rating is **Critical**, preserving the authoritative lifecycle severity and score. Process assurance is **not asserted**.

CRITICAL	HIGH	MEDIUM	LOW	REFUTED
1	0	0	0	0

ID	FINDING	CVSS 4.0	PRIORITY	SEVERITY
claim-c106c6423d501b6003b20b19	A bounded DEMO fixture hypothesis.	–	P0	CRITICAL

2 Scope and process coverage

These are retained accepted-output and completion-control records. No process-assurance score is asserted.

A = not asserted by retained publication

FAMILY	w_k	OK	GAPS	BLOCKED	NOT BUILT	N/A	A_k
Retained accepted lifecycle evidence	1	6	0	0	0	0	–
Completion and publication controls	1	3	0	0	0	0	–

2.1 Retained accepted lifecycle evidence

Accepted producer references preserved by the final evidence-trace index.

3 Findings

Findings reach this section only after refutation (lane 08) and, for High or Critical, independent verification (lane 09). Refuted hypotheses are kept for the record with priority zero.

claim-c106c6423d501b6003b20b19

CRITICAL

A bounded DEMO fixture hypothesis.

LOCATION evidence.json#/observed
 COMPONENT component-1 Not asserted by retained publication
 CVSS 4.0 not scored
 EVIDENCE / STATUS DIRECT_EVIDENCE · VERIFIED · unknown

$$S_{lifecycle} = 16.0, \quad priority = P0$$

Bounded DEMO fixture evidence exists.

LANE TRAIL

synthesis retained verified claim; confidence medium → **publication** FINAL_APPROVED with human signoff

EVIDENCE

E-001 evidence-source: evidence.json

REMEDIATION

No remediation assertion is present in the retained publication.

4 Coverage gaps

Each item below is an area the review did not fully examine. None of them may be read as “no issues”. No coverage-gap records are present in the retained publication. This is not an assertion of complete target coverage.

5 Scoring method

Finding severity, lifecycle score, and priority are copied verbatim from the retained verified finding. No CVSS vector, presentation priority, process-assurance score, or coverage-derived rating is calculated. The overall rating preserves the most severe non-refuted authoritative finding severity.
